

IICRC Rug Cleaning Technician

WARNING:

This ain't no ordinary "how-to clean rugs" seminar where you sit in your chair and learn a bunch of irrelevant theory and practice cleaning on one or two measly rugs...

If you are expecting an easy "take-the-course, pass-the-test, get-a-patch" certification class you are in for a real shock.

This course SHOULD be called "Rug Cleaners BOOT CAMP"

The 3-Day IICRC Rug Cleaning Technician Course taught by Ruth Travis, "The Rug Lady" and Jeff Bishop of Clean Care Seminars is an intense, hands-on, information-packed, rug cleaning **experience!**

Ruth brings over **150 rugs from all over the world** for you to see, feel and compare. She will teach you **how to identify** the different styles, weaves, fibers and manufacturing methods of hand-made and machine woven rugs.

The hands-on is taught by Jeff Bishop who will demonstrate how to do the actual work of cleaning with a variety of methods. Learn how to clean just about any kind of rug, even "problem" rugs.

Jeff demonstrates a minimum of 5 different cleaning methods as well as how to properly inspect, test, qualify, dust, pre-treat and clean all types of area rugs.

The hands-on portion of the class **includes a full setup of a full immersion wash pit**, rug duster and drying rack. You have the opportunity to "get in the pit" and apply your newly acquired knowledge. In fact, depending on participation, it is not uncommon for students to **clean 10 to 20 rugs during the course.**

Plus, Jeff and Ruth demonstrate techniques to solve common problems like rippling, color run, fringe browning, and even color loss!

If you want to earn **\$3 to \$5 per square foot** (or more!) cleaning rugs, you need to attend this course.
